

Holly Class Highlights

10th May 2020

This is a gigantic sandy beach. It smells like sea weed. It is boiling hot, like an oven, but there's a cool breeze from the sea. The wet dolphins are leaping quickly out of the rolling blue waves. The tall, springy palm trees are very shady. In the distance, the enormous rocky volcano is erupting menacingly. The lava is hot and colourful. This is my favourite picture in the Snail and the Whale.

Asia
 Asia is big. It's the largest continent by area (about a third of world's land is here). It has the highest population out of all the continents.
 Oceans: Pacific ocean, Indian ocean, Arctic ocean.
 Pacific ocean: Humpback whale, Killer whale, sea otter, elephant seal, Manatee, sea slug, tiger sea lion, Great white, Northern fur seal, Bull shark, fur seal.

MAGICAL PLANT
 My plant will grow
 I pads and water bottles.
 Then I can play on
 loads of I pads and I can
 drink loads of water.
 When I get thirsty
 I'll share my I pads
 and my bottles with my
 friends.
