

**Science – Year 1/2A Summer 2**

Living Things and Their Habitats

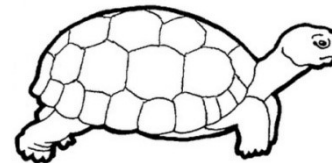

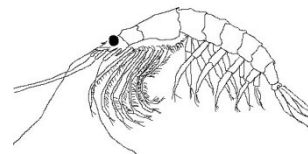

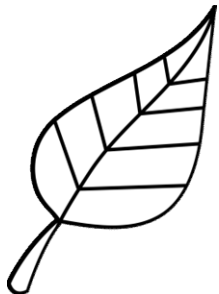

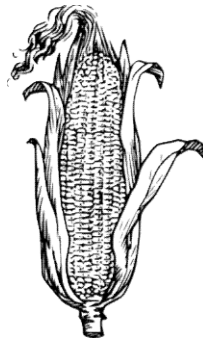

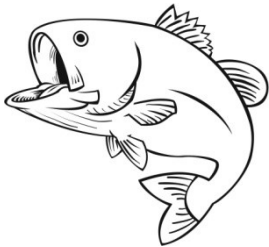

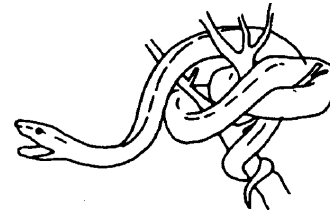

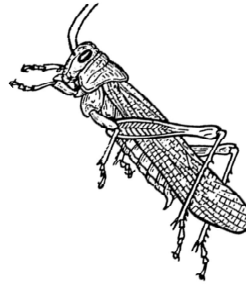

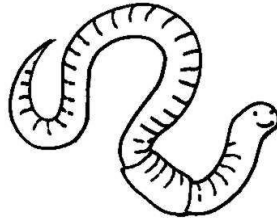

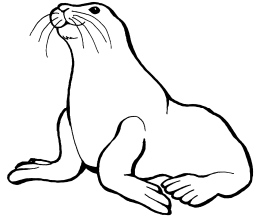

# **Food Chains**

Session 1

Resource Pack

### Food Chain Game

Cut these out and give one to each child. Ask the child to sit down and mime or make the noise of their animal. The children who think they are predators should stand up first, look around and find their 'food'. When they have done so, they should link arms with the child who is that creature. They, in turn, should look around for their food, link arms and continue. The winners are the first group of children to form a correct chain.
