## Post Cards

This week in English, Year 1 children have been looking at the features of a postcard. The children have explored the island of Jamaica and looked at what they could do on holiday there. The children worked together in groups to sort pictures based on what they might see, hear, smell, touch, or taste on their 'holiday' in Jamaica. This will help the children develop their ideas ready to plan and write their own postcard from Jamaica. **Which country or countries have you visited? Have you got postcards you can share with the children?**

## PE

In PE, the Year 5 children have been practising relay races as part of their athletics sequence of learning. They have been focussing on the effective passing of the baton to save as much time as possible.

## Plants

As part of Year 2 work about plants this term, the children learnt about house plants and the types of conditions they need to grow healthily. They also looked at some of the adaptations the plants had to grow in their natural habitat, such as fleshy leaves and roots that store water.

Some facts about plants. Can you think of others?

- Some plants are **carnivorous**. This means they eat other living things! They gain nutrients from some insects and spiders, e.g., Venus flytraps.
- Some plants have adapted to defend themselves from animals. Plant defences include stings and poisons.
- 80% of flowering plants are adapted for pollination by animals (mostly insects).
- Honey bees** account for 80% of all insect pollination.
- Nearly all chocolate relies on midges pollinating the cocoa plant, which might make them seem slightly less annoying!
